

Consent for Permanent Cosmetics

I hereby request and consent to the application of permanent color and consent to have the following procedures performed by _____.

Please check any of the following which pertain to you:

- ☐ Eyeliner,
 ☐ Eyebrows,
 ☐ Lip Liner,
 ☐ Full Lip Color,
 ☐ Scar Camouflage,
 ☐ Beauty Mark,
 ☐ Areola Repigmentation,
 ☐ Other _____

Please read and initial the following statements:

- I understand that the process used to apply color is not a one-step process and requires subsequent visits to achieve desired results. I further understand that the fee includes my first visit and ONE perfecting visit. Maintenance touch-ups are scheduled as needed and may vary from six months to three years. Fees for maintenance visits, pigment replacements, and scar camouflage are based on an hourly fee.
- I understand that with time, pigment can, and will, fade and change color according to metabolism, skin type, and age, and exposure to sun, smoking, alcohol, medications, Retin-A, and Glycolic acids.
- I acknowledge that no guarantees have been made to me concerning the results of this procedure and that the professional recommendation is a NATURAL LOOK.
- I understand the nature of the procedure and possible complications or adverse effects that may occur as a result of applied pigments. I fully understand this is a tattooing process; therefore, not a science but an art.*
- I have received and acknowledged pre- and post-procedure instructions and agree to strictly adhere to such instructions.
- I accept responsibility for determining the color, shape, and position of the pigments that will be applied. I understand the actual color of the pigment may be modified slightly due to the tone and color of my skin.
- I understand the taking of photographs, before *and* after the procedures is required.

* The known possible complications from micropigmentation are: redness, swelling, puffiness, bruising, dry patches, and tenderness. It is normal to lose approximately 1/3 of the color during the healing process. After most procedures the color may be a shade too dark; in six days it will appear too light. After ten days the color will show more than it did initially. It will appear softer when completely healed as the color will come from the dermal layer of the skin to the epidermal layer of the skin. **In the event of a CAT scan or MRI, please inform your physician of your Iron Oxide Permanent Cosmetics as some pulling or burning sensation may occur during the procedure.**
